

# RECONEYZ DATASHEET

## BRIDGE IO

MODEL NUMBER: IO2640—00—II0J

Rev 0.2 10.05.2021

ORDER CODES:  
BRIDGE IO: **72120**

### GENERAL

Bridge IO is a multi-frequency radio transceiver that connects Detectors with Reconeyz Cloud. Bridge IO 4G combines two communication modules: short-range radio, long-range radio. Bridge IO is powered externally by a 12V DC source and also includes an internal backup battery. Bridge IO can also control external devices via 5 relays.

## SHORT RANGE RADIO

Short-range radio is used for two-way communication between the Bridge and the Detectors. Bridge has a 2,4 GHz radio module for communication with Detectors. Short-range 2.4GHz radio is used for two-way communication between the Detector and other Reconeyez devices.

|                             |                            |
|-----------------------------|----------------------------|
| Standard                    | IEEE 802.11.4              |
| Bandwidth                   | 2 Mhz                      |
| Data rate                   | 250 kbps                   |
| Modulation                  | QPSK                       |
| Antenna                     | Omnidirectional (external) |
| EIRP                        | 12 dBm                     |
| Security                    | ECC (secp160r1)            |
| Authentication & encryption | AES 128                    |
| Max LOS distance            | 500 m                      |
| Network topology            | mesh                       |

## LONG RANGE RADIO

Long-range radio is used for two-way communication between the Bridge and the Command Center server. Bridge uses a 4G module for communication with the server.

|             |                            |
|-------------|----------------------------|
| Module type | LE910C4-EU                 |
| Region      | EMEA                       |
| 4G bands    | B1, B3, B7, B8, B20, B28A  |
| 3G bands    | B1, B3, B8                 |
| 2G bands    | B3, B8                     |
| Antenna     | Omnidirectional (internal) |

## EXTERNAL POWER SOURCE

Under normal operating conditions the Bridge IO is powered by an external 12V DC power source. The external power source can be an AC/DC adapter, PoE (power over ethernet) splitter or an external battery or any other source that meets the following specification.

|                               |   |
|-------------------------------|---|
| Voltage                       | 9-15V DC  |
| Max current                   | 2A  |
| Standby current               | ~10mA   |
| Power input connector         | Pluggable terminal block (for bare wire connection) |
| Power cable external diameter | 3-6.5mm (sealed with M12 cable gland)               |
| Recommended min. wire size    | 0.75 mm <sup>2</sup> /AWG 18                        |

## INTERNAL BACKUP BATTERY

Bridge IO includes an internal rechargeable Li-Ion backup battery. When the external 12V DC power source fails, the device switches seamlessly to the internal backup battery and sends a status message to the command center.

|                  |  |
|------------------|--|
| Voltage          | 3.7V                                       |
| Capacity         | 10,2 Ah                                    |
| Time to recharge | 10 hours (when external power is restored) |

## RELAY OUTPUTS

Bridge IO includes 5 relay outputs for controlling external devices. Two conductor cables can be connected to the relay output using a pluggable terminal block and sealed with a M12 cable gland.

|   |   |
|---|---|
| Relay type  | 1 Form C (SPDT-NO, NC)                              |
| Part number   | RZ03-1C4-D005                                       |
| Relay output rating                                 | 8A 250V   |
| Relay contact rating                                | 16A 250VAC  |
| Limiting making current<br>max. 4s, duty factor 10% | 30A   |
| max. 20ms   | 80A   |
| Breaking capacity max                               | 3000VA  |
| Cycles  | 6x10 <sup>3</sup>                                   |
| Relay output connector                              | Pluggable terminal block (for bare wire connection) |
| Output cable external diameter                      | 3-6.5mm<br>(sealed with M12 cable gland)            |
| Recommended min. wire size                          | 1.3mm <sup>2</sup> / AWG 16                         |

## ENVIRONMENTAL

Working temperature range -40°C to +60°C

IP rating IP66

## MECHANICAL
